### RADIO STATION AUTHORIZATION

LICENSEE: HYSKY COMMUNICATIONS, LLC

ATTN: JAMES V. ROOTSEY  
HYSKY COMMUNICATIONS, LLC  
13455 NOEL ROAD, SUITE 300  
DALLAS, TX 75240

<b>Call Sign</b> WPKU683	<b>File Number</b> 0003719736
<b>Radio Service</b> IG - Industrial/Business Pool, Conventional	
<b>Regulatory Status</b> PMRS	
<b>Frequency Coordination Number</b>	

FCC Registration Number (FRN): 0015946890

<b>Grant Date</b> 07-20-2002	<b>Effective Date</b> 01-29-2009	<b>Expiration Date</b> 07-23-2012	<b>Print Date</b> 01-29-2009
---------------------------------	-------------------------------------	--------------------------------------	---------------------------------

### STATION TECHNICAL SPECIFICATIONS

#### Fixed Location Address or Mobile Area of Operation

**Loc. 1**    **Area of Operation**  
Operating Nationwide including Hawaii, Alaska, and US Territories

#### Antennas

Loc. No.	Ant. No.	Frequencies (MHz)	Sta. Cls.	No. Units	No. Pagers	Emission Designator	Output Power (watts)	ERP (watts)	Ant. Ht./Tp meters	Ant. AAT meters	Construct Deadline Date
1	1	000005.77500000	MO	10000		2K80G1D	15.000	1.000			
1	1	000005.77800000	MO	10000		2K80G1D	15.000	1.000

#### Conditions:

Pursuant to §309(h) of the Communications Act of 1934, as amended, 47 U.S.C. §309(h), this license is subject to the following conditions: This license shall not vest in the licensee any right to operate the station nor any right in the use of the frequencies designated in the license beyond the term thereof nor in any other manner than authorized herein. Neither the license nor the right granted thereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934, as amended. See 47 U.S.C. § 310(d). This license is subject in terms to the right of use or control conferred by §706 of the Communications Act of 1934, as amended. See 47 U.S.C. §606.

#### Control Points

##### Control Pt. No. 1

Address: 551 Elkcarn Circle

City: Marco Island

County: COLLIER

State: FL

Telephone Number: (239)389-9927

#### Waivers/Conditions:

Order DA-02-545 special conditions:

1. Secondary service. The service provided by the system is a secondary service subject to the provisions of Section 2.104(d)(3) of the Federal Communications Commission(FCC) rules (47 C.F.R. § 2.104(d)(3)).

2. Equipment certification. Each HF transmitter used by the system must be of a type that has received a grant of certification pursuant to the Equipment

Authorization Procedures set forth in Part 2, Subpart J of the FCC rules (47 C.F.R. part 2, subpart J). Grant of certification will be based on compliance with the following equipment technical specifications:

a. Transmitter power output. The transmitter power output must not exceed 15 watts.

b. Carrier frequency stability. The carrier frequency must be stable to  $\pm 10$  parts per million over an environmental temperature range of -20 to +70 degrees Celsius.

c. Emission type. The operational modulated emission type must be 2K80G1D. Type N0N emission capability is permitted in a test mode; otherwise the energy must be spread over a 2.8kHz bandwidth.

d. Emission mask. The authorized bandwidth is 3.0kHz. The power of emissions outside of the authorized bandwidth must be attenuated below the power of the unmodulated carrier wave in accordance with the following:

On any frequency displaced from the carrier frequency by: the power of emissions must be attenuated by: 1.5 to 4.0kHz the power of emissions must be attenuated by: At least 25 dB On any frequency displaced from the carrier frequency by: the power of emissions must be attenuated by: 4.0 to 7.5kHz the power of emissions must be attenuated by: At least 35 dB On any frequency displaced from the carrier frequency by: the power of emissions must be attenuated by: More than 7.5kHz the power of emissions must be attenuated by: At least 43dB

3. Station identification. Each HF transmitted packet must be identified by a digital identifier embedded in the preamble of the packet.

4. Duration of transmissions. The duration of each HF transmission by each transmitter must not exceed 4 seconds. The licensee must maintain a daily record of the 7-day moving average of the durations of all completed HF transmissions and notify the FCC by letter if it appears that such average is regularly exceeding 2 seconds.

5. Occupancy. Accumulated transmissions by the system on each HF channel must not exceed one percent (36 seconds) in each hour in each geographical area in the contiguous United States bounded by each 5 degrees of latitude (beginning at 49° North Latitude and proceeding Southward) and each 5 degrees of longitude (beginning at 70° West Longitude and proceeding Westward).

6. Daily average power density limit; daily transmitted energy limit. The number of messages transmitted by the system must be limited such that (a) the daily accumulated average power density over the contiguous United States does not exceed  $-174 \text{ dBW/Hz-m}^2$  and (b) the total HF radio frequency energy transmitted daily by the system does not exceed 2 million Watt-seconds. 7. Radiated power. The radiated power of the HF transmitter and its antenna system(s) as typically installed must not exceed one Watt. Radiated power is considered to be the antenna current squared multiplied by the theoretical radiation resistance of the antenna at the operating frequency, that is, it excludes ohmic and ground losses.

8. Master control center functions. HF transmissions must be controlled by a master control center that is capable of (a) preventing transmissions on individual channels or frequency bands and (b) shutting down the entire system. The master control center must assess HF channel occupancy using a minimum of six diverse receive sites. HF channel occupancy assessments indicating a clear (available) channel must be valid for no longer than 10 seconds. HF transmitters must not transmit on any channel unless and until that channel has been declared clear by the master control center. If the master control center is directed by an authorized official of the FCC to cease transmissions on specific HF channel(s), transmissions on the specified channel(s) must cease within one hour after such direction. If an authorized official of the National Telecommunications and Information Administration (NTIA) advises the FCC that the system should cease all transmissions on specific HF channel(s), the FCC may immediately direct the master control center to do so.

9. HF transmitting antennas. HF transmit antennas used in the system must be of a type that has no more directivity than a half-wavelength dipole antenna or a quarter-wavelength monopole on a ground plane, based on free-space radiation patterns.

10. Publicly available log of transmissions. The licensee must log and make publicly available via the internet the time, frequency, location and duration of all completed HF transmissions for the prior 24 hours. The uniform resource locator (URL) or web site address of the internet log must be provided to the FCC and to the NTIA. To the extent possible, the log data must be sorted and presented in a manner that facilitates identification of specific transmissions.

11. Carrier frequencies. The system may make HF transmissions using only the carrier frequencies specified on the following pages (in kHz). This list of carrier frequencies may be modified at the licensee's request, in consultation with the FCC and the NTIA, provided that (a) the total number of 3kHz (bandwidth) channels listed for use by the system does not exceed 954 (equivalent to a total authorized spectrum of 2.862MHz) and (b) a 15kHz guard band is maintained between spectrum used by the system and all aeronautical, radio astronomy, maritime, amateur, time standard and industrial, scientific and medical bands. The FCC may modify the list of carrier frequencies if necessary to accommodate changes in international or domestic HF band allocations to the aforementioned primary services.
